3. Sets under private label. We produce over 20 private labels.

# Maestro Smak™, GO-PACK™

# Why it is worth to work with us?

The food foil packaging market is **very promising**, because it is in a phase of active growth due to the policy of environmental preservation.

Our products **do not harm** the **human health and environment**, it is 100% recyclable.

Our products have all necessary **European Quality Certificates**, and the production complex is certified by the ISO system.

# Why it is worth to work with us?

We have been working for 12 years in the markets of Ukraine, Europe and CIS. StudioPak is recommended as **a reliable manufacturer** and supplier.

We offer the best range of products, reasonable **prices** and short-term logistics. Our offer includes a comprehensive solution (food foil packaging, lids and packaging machines).

We **quickly and flexibly** respond to requests due to the qualified employees and optimization of management and production processes.

# Benefits of aluminum foil trays

**Hygiene.** Aluminum foil containers are sterile, do not contain superficial bacterial, aluminum itself hinders development of microorganisms.

**Barrier properties.** Aluminum foil containers prevent evaporation, drying out, moistening, fully insulated food from influence of light stuffs, hinder penetration of smells.

**Heat conductivity.** Containers from a food alufoil possess ability evenly to conduct warmly.

# Benefits of aluminum foil trays

**Heat-tolerance.** Aluminum foil containers maintain high temperatures up to +600°C, protecting products from cracking, charring and burning.

**Eco friendliness.** Aluminum can be 100% processed, is an ecologically clean material, and is preferable for consumers that are concerned about environmental protection.

**Multifunctionality.** Aluminum foil containers assume a great number of packing options using different lids.
